

# Ausco Ameri-Torque™ brakes:

- 20% more stopping power than drum brakes
- 45% more parking torque
- 33% longer life
- Braking power won't fade
- Quick and simple to install
- Easy pad replacement
- Easy inspection
- 100% made in the U.S.A.

## The world leader in off-highway braking systems

Ausco Products uses its 70 years of braking experience to design and build OEM brakes for construction, agricultural, mining, turf care and utility vehicles for some of the biggest manufacturers: John Deere, Caterpillar, Toro, Polaris, Case New Holland and Agco, to name a few. We produce the widest variety of service and parking brakes in the industry, including spring-applied multi-disc, hydraulic calipers, mechanical calipers and ball ramp brakes.

Trust the leader in off-highway braking to give your upgraded golf car upgraded braking power and safety.

Standard golf cars weren't designed for what you need.

Neither were their  
**brakes!**

You upgraded your  
**golf car**

Now upgrade your  
**brakes!**

Standard brakes can't handle your upgraded golf car. Ausco's Ameri-Torque™ caliper disc brake has the power to stop and hold better than original equipment drum brakes ... to last longer between pad changes ... install easier than other replacements.

Made tough. Made to last. Made in America.

### **More stopping power and parking performance than drum brakes**

- 20% more braking power to handle heavier loads, bigger wheels and higher speeds
- 45% more holding power to park heavier vehicles with bigger wheels on steeper grades
- 33% longer lining life for fewer pad changes and less maintenance

### **Quick and easy installation**

- Easy replacement – no drilling, welding or modifications. Just bolt to existing holes!
- Installs with only simple hand tools
- Uses existing cable and pedal system
- Open design allows easy visual inspection and pad changes

### **100% made in the U.S.A.**

- Designed and manufactured using American-made parts
- High quality you can trust
- Proprietary non-asbestos linings
- Patent pending
